J Dec 2, 2013 -dan-pembahasan-14 soal medspin kedokteran unair dan pembahasan.14 Clarification through answers from comments. A: I found a way to do it library(rvest) library(tidyverse) options(tidyverse.set\_global(dev\_mode = FALSE)) url %  
html\_nodes(xpath = '//title') %>% html\_text() %>% set\_names(paste0('title\_',1:8)) # read descriptions url\_desc %  
html\_nodes(xpath = '//div[@class="body-text"]//ul[@class="main-text"]//div[@class="text"']') %>% html\_text() %>%  
set\_names(paste0('desc\_',1:8)) # read extracted text url\_data % html\_nodes(xpath = "//div[@class='body']//div[@class='text'']")  
%>% html\_text() %>% set\_names(paste0('desc\_', 1:8)) # add titles and descriptions to the dataframe df f678ea9f9e
